Address

Sahiwal, Pubjab Pakistan

Education

2016 – 2020

BS in Information
Technology (BSIT)

BZU Multan, Pakistan

2014 – 2016

FSC(Pre. Engineering)

GPGCS Sahiwal, Pakistan

Expertise

- React.js
- HTML5, CSS3, Bootstrap
- Javascript, Node.js, Express.js
- PHP, Laravel, CodeIgniter
- MongoDB, Mongoose, MySQL
- Git, GitHub, CI/CD Pipelines
- Postman, PHPUnit, Chrome DevTools
- RESTful APIs
- Google Map Apis
- Social Media APIs

Muhammad Irfan

Full Stack Developer

Dynamic and results-driven Full Stack Developer with over 6 years of experience designing, developing, and deploying scalable web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js), Laravel, Php, Angular. Adept at building responsive, high-performance applications and integrating complex APIs to deliver seamless user experiences. Skilled in both frontend and backend development, with a strong focus on clean code, modern architecture, and agile methodologies. Passionate about continuous learning, problem-solving, and contributing to innovative digital solutions that drive business growth.

Experience

2022 - Present

Eiglou Technologies

Senior Full Stack Developer

- Lead the development of scalable web applications using Laravel, React, Node and Docker, improving system performance by 30%.
- Designed and implemented RESTful APIs with MongoDB databases for seamless integration between frontend and backend systems.
- Collaborated with UI/UX designers to create responsive, user-friendly interfaces that enhanced customer engagement.
- Mentored junior developers and introduced code review processes, improving team productivity and code quality.
- Integrated payment gateways, Google Maps APIs, and social media APIs to extend application functionality.
- Implemented Dockerization to streamline application deployment, scalability, and environment consistency.
- Utilized GitHub for version control, collaboration, and efficient code management across development teams.

Language

English

Urdu

2020 - 2022

Enzipe Software Solutions

Full Stack Software Developer

- Developed and maintained full-stack applications using CodeIgniter, Laravel, and AngularJS.
- Implemented real-time data tracking and reporting modules, reducing manual data processing by 40%.
- Collaborated with DevOps teams to automate deployment pipelines using Docker and Git CI/CD.
- Optimized database queries and caching strategies, improving load times and scalability.

2018 - 2020

HaddockSoft Technologies

Associate Software Developer

- Assisted in developing web applications using PHP and MySQL, focusing on backend logic and data management.
- Worked closely with designers to translate UI/UX wireframes into functional, responsive web pages.
- Participated in Agile sprints, contributing to planning, testing, and deployment phases.
- Deployed and maintained applications in Dockerized environments, ensuring smooth CI/CD pipelines and version control with Git.
- Implemented **authentication and authorization** using JWT and OAuth for secure user access.
- Focused on optimizing performance, maintaining code quality, and ensuring system reliability.
